-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 6, and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moore in view of Ishiwatari.

Moore discloses a volatilizing apparatus comprising a container 20 having a container body and a lid 24 covering the container body, the lid being attached to the container body through a hinge member 23 as recited, a volatilizing body having one end in fixed with the inner face of the container body and the other end contacting the inner face of the lid. Ishiwatari teaches a volatilizing apparatus comprising a volatilizing body 10 having a laminated honeycomb structure holding a volatile agent and adapted to expand upon movement of plane members 12a and 12b. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of Moore by replacing the volatilizing body with a volatilizing body having a honeycomb structure as taught by Ishiwatari in which when one of the planes 12a or 12b is fixed to the inner face of the lid, volatilizing body of Ishiwatari will expand when the lid is opened to dispense an air freshening substance.

Allowable Subject Matter

Art Unit: 3752

3. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Martens, Amidzich, Van Vlahakis et al., Spector et al., and Hahn are pertinent to Applicant's invention.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davis D. Hwu whose telephone number is 571-272-4904.
